

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

A SIMPLIFIED TYPEWRITER

THE REMINGTON JUNIOR

Small in size—but big in capacity

Remington-built

Light in weight—but heavy in stability

Appearance—

No Sign of Pen Value

To many of the millions of pen users most pens *look* very much alike. So you should be guided by some safer criterion than *looks*.

The safest gauge of value is success. So purchasers of Esterbrook Pens (successful for over half a century) have the comfortable feeling that satisfaction is assured.

No. 313 shown here is only second in popularity to the famous Jackson Stub, No. 442, having a slightly broader, moderately elastic, medium point.

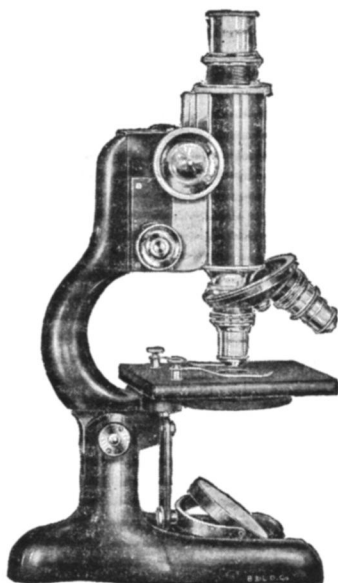

Send 10c for useful metal box containing samples of the 12 most popular Esterbrook Pens, including the famous 048 Falcon, the most popular pen in the world.

Notable Elements of Special Interest

as well as optical efficiency and practicality distinguished many of the new models in the wide line of

Bausch^{and} Lomb Microscopes

Among the recent improvements suggested by our more than 60 years of optical experience are our lever type of side fine adjustment, the unusual space for manipulation afforded by the curved handle arm, and the seamless rubber which completely covers the stage.

Model FS2 (illustrated) has our lever side fine adjustment with extremely delicate movement for high powers. It is eminently fitted for classroom or research work. Price \$34.00.

Other compound microscopes from \$18.00 up—simple microscopes from \$2.50 up.

Special Terms to Educational Institutions
